

## npm

- node package manager
- a utility to manage the package developed for nodejs
- can be used for
  - installing packages
  - upgrading

## a basic express application

```
const express = require('express')

const app = express()
app.listen(3000, '0.0.0.0', () => {
  console.log('server started')
})
```

## route

- mapping of http method, url, and handler (function)

```
//this route will be invoked when the request
app.get('/', (request, response) => {
  response.end()
})
```
